Note the following when reading the RSTFR register as the reset source determination for the above products.

As the value read from the RSTFR register may be undefined, write 00h to the register before reading it. Execute these two instructions successively.

Program Example:

```
MOV.B #00H, RSTFR ; Write 00h to the RSTFR register
```

```
MOV.B RSTFR, A0 ; Read the RSTFR register
```
