E8a Emulator Software Revised to V.1.01 Release 01

We have revised the emulator software for the E8a on-chip debugging emulator from V.1.01 Release 00 to V.1.01 Release 01.

1. Descriptions of Revision

1.1 Emulator Debugger Revised

Among the emulator debuggers included in E8a Emulator Software, H8 Tiny/ Super Low Power E8a Emulator Debugger has only been revised. Note that the others, which are listed below, are not affected.

- R8C E8a Emulator Debugger V.1.01.00
- M16C E8a Emulator Debugger V.1.01.00
- M32C E8a Emulator Debugger V.1.01.00
- 740 E8a Emulator Debugger V.1.01.00
- H8 Tiny/ Super Low Power E8a Emulator Debugger V.1.01.02

1.2 Supported MCUs Increased

The following MCUs have been added to the support line:

- The MCUs of product number H8/38537F, the H8/38537 group, H8/300H Super Low Power series

2. How to Update Your Product

Free-of-charge online update is available. Update yours using AutoUpdate Utility; otherwise, download the update program from the Web site at

http://www.renesas.com/en/e8a_download

and execute it.

AutoUpdate Utility and the Web site are available on and after September 22.

The above URL is that of our global site (in English).

NOTICE:

This latest version is the debugger package edition; that is, it includes only the E8a emulator debuggers and the user's manuals of them and does not come with High-performance Embedded Workshop. So the product must be installed in the development environment where High-performance Embedded Workshop V.4.04.01 or later has already been installed.
