Integrated Development Environment High-performance Embedded Workshop Updated to Ver.3.0.05

We have updated the High-performance Embedded Workshop, an integrated development environment, from Ver.3.0.02 to Ver.3.0.05.

Please refer to this release information together.

1. Products and Versions Concerned

- (1) High-performance Embedded Workshop Version 3.01 (release 1) bundled with the M3T-NC30WA V.5.20 Release 1 C compiler
- (2) High-performance Embedded Workshop Version 3.01 (release 1) bundled with the M3T-NC30WA C compiler (Free version for R8C/Tiny only)
- (3) High-performance Embedded Workshop Version 3.0.02 (release 5) bundled with the M3T-CC32R V.4.20 Release 1 cross-tool kit
- (4) High-performance Embedded Workshop Version 3.0.02 (release 5) updated by the hewv3002u2.exe updater.

2. Description of Update

The problem on displaying files edited by an external editor on the Editor window has been fixed.

For details, see RENESAS TOOL NEWS (RSO-HEW_2-040116D) "A Note on Using Integrated Development Environment High-performance Embedded Workshop--On Editor Window" issued on January 16, 2004 in this series of news.

3. How to Get the Updated Product

- (1) Download the hewv3005u.exe file from this page.
- (2) Execute the downloaded hewv3005u.exe to complete the installation.

4. Notices

- (1) If you have not already installed the High-performance Embedded Workshop Ver.3.0, High-performance Embedded Workshop Ver.3.01 or High-performance Embedded Workshop Ver.3.0.02, your High-performance Embedded Workshop cannot be updated to Ver.3.0.05.
- (2) None of your tool components except the High-performance Embedded Workshop (for example, the compiler, simulator, etc.) is not affected by this update.
