Software for Flash Memory Programmer PG-FP5 Revised

We have revised the software for flash memory programmer PG-FP5. For an overview of PG-FP5, go to:

https://www.renesas.com/pg_fp5

The above URL is one of our global sites.

1. Your Software Products to Be updated

You can update the following software products to the latest versions:

Product	Latest Version
Firmware V2.07 and earlier	V2.09 (V2.08 not assigned)
Programming GUI V2.07 and earlier	V2.09 (V2.08 not assigned)

For how to check your products' version numbers, see the user's manual of PG-FP5 (PG-FP5 Flash Memory Programmer User's Manual).

Note that FPGA data has not been revised from V4, so use FPGA data V4.

2. Description of Revision

The following known problem has been fixed:

- With reading out data from flash memory in an MCU of the R8C family

For details of the problem, see RENESAS TOOL NEWS Document No.

3. Updating Your Products

Online update is available free of charge. To update yours, download each of the update programs from:

https://www.renesas.com/pg_fp5_download

Then execute them. The update programs will be published on this site on August 10, 2012.

For details of update, see the user's manual of PG-FP5.
