## Two Emulator Software Packages for Four E6000 Emulators Revised (Used for the H8S and H8 MCU Families)

We have revised the two emulator software products for the E6000 emulators HS2633REPI61H, HS2633EPI61H (spare only), HS3664EPI62H, and HS3664EPI61H (spare only) as follows:

- The emulator software for HS2633REPI61H and HS2633EPI61H From V.6.00 Release 00 to V.6.00 Release 01
- The emulator software for HS3664EPI62H and HS3664EPI61H From V.6.01 Release 01 to V.6.02 Release 00

---

### 1. Products and Versions to Be Updated

- (1) The emulator software for HS2633REPI61H and HS2633EPI61H (spare only) V2.0.00 through V.6.00 Release 00
- (2) The emulator software for HS3664EPI62H and HS3664EPI61H (spare only) V2.0.00 through V.6.01 Release 01

**NOTICE :** See Section 3 if you update any of the above products whose version is earlier than V2.0.00.

### 2. Descriptions of Revision

#### 2.1 In the Product for HS2633REPI61H and HS2633EPI61H

- (1) High-performance Embedded Workshop updated to V.4.00.02.
- (2) Fixed the problem that if you have created workspaces with any version of H8S/2633 E6000 Emulator software earlier than V.6.00.00, opening them using V.6.00.00 will cause the emulator software not to communicate with the emulator.

#### 2.2 In the Product for HS3664EPI62H and HS3664EPI61H

The members of the H8/36079 and H8/36078 groups, H8 MCU family supported.

### 3. About the Products and Versions to Be Updated

All the products and versions to be updated (described in Section 1) are supported by High-performance Embedded Workshop.

On the other hand, the products whose versions are earlier than those to be updated are of the HDI edition. Though the HDI products can also be updated, note that they will run only with High-performance Embedded Workshop if updated.

The version of your emulator software can be informed by checking for the version number of E6000 Target Platform. If yours is any of the products and versions to be updated, the version number of E6000 Target Platform will fall in either of the following ranges:

- (1) H8S/2633 E6000 Target Platform: V2.0.00 through V.6.00.00
- (2) H8/3664 E6000 Target Platform: V2.0.00 through V.6.01.01

To check for the version number of your E6000 Target Platform, perform the following procedures:

- (1) In High-performance Embedded Workshop, open the Tool menu and select the Administration command. The Administration dialog box appears.
- (2) In the Registered Components list, open the Debugger Components folder, and you see the version number of your E6000 Target Platform.

### 4. How to Update Your Product

Free-of-charge online update is available. Download the update program (.exe file) for your product from the Web site and then execute it.

#### NOTICE:

If the update program is executed in the system where High-performance Embedded Workshop earlier than the one included in your specific revised product, the IDE will be updated to the version included in your specific revised product.

However, no High-performance Embedded Workshop will not be replaced with an earlier one.

Note that High-performance Embedded Workshop later than the one included in the revised products will allow you to use in the revised product.
